

DÜNYADA PAKDUŞ / PAKDUŞ IN THE WORLD

Türkiye’de duş kabin sektörünün öncü markalarından biri olan PAKDUŞ, güçlü üretim altyapısı ve kalite odaklı yaklaşımıyla uluslararası pazarlarda da etkin bir konuma sahiptir.

İhracat alanındaki güçlü tecrübesi sayesinde, uluslararası pazarda güvenilir bir iş ortağı olarak konumlanır. Avrupa’dan Orta Doğu’ya, Arap Yarımadası’ndan Kuzey ve Orta Afrika’ya, Rusya’ya kadar uzanan geniş bir coğrafyada 20’yi aşkın ülkeye düzenli ihracat gerçekleştirir. Bu geniş ihracat ağı, markanın global ölçekte kabul gören kalite anlayışının ve rekabet gücünün önemli bir göstergesidir.

Güçlü kurumsal yapısı, sürdürülebilir kalite anlayışı ve müşteri odaklı yaklaşımıyla PAKDUŞ, sektöründe sadece bugünün değil, geleceğin de lider markaları arasında yer alma hedefiyle ilerlemektedir.

As one of Türkiye’s leading brands in the shower enclosure sector, PAKDUŞ holds a strong position in international markets thanks to its robust production infrastructure and quality-focused approach.

With extensive experience in exports, the company has established itself as a reliable partner in global markets. It regularly exports to more than 20 countries across a wide geography, from Europe to the Middle East, the Arabian Peninsula to North and Central Africa, and Russia. This broad export network is a key indicator of the brand’s globally recognized commitment to quality and its competitive strength.

With its strong corporate structure, sustainable quality approach, and customer-focused mindset, PAKDUŞ continues to advance with the goal of being not only a leader today but also a driving force in the sector of the future.

TEKNİK GÜÇ ESTETİK İLE BİRLİKTE...

TECHNICAL PERFECTION COMBINES WITH AESTHETICS...

1996 yılında PAKDUŞ, üretime başlamış, kapasitesini sürekli arttırarak Türkiye'nin önemli duş kabini üreticilerinden biri olmuştur.

ÜRETİM: Pazar taleplerini dikkate alarak yeni ürünlerin geliştirilmesi sağlanmaktadır. Uygulama araştırmaları ile ürünlerin performans ve özellikleri test edilmektedir. Böylece kalite güvencesi sağlanırken, verimli bir uygulama ile son üründe aranan optimal **fiyat/performans** dengesi temin edilmektedir.

ÜRÜNLER: Teknik gücü estetik ile birleştirerek üretimi gerçekleştirilen modeller ile her türlü tüketici tercihi karşılanmaktadır. **Ölçü tespitinde uzmanlaşmış kadrosuyla**, ölçüye bağlı oluşabilecek sorunlar minimize edilmektedir.

MONTAJ: **Profesyonel, özenli montaj ekipleri**, müşteri memnuniyetini ön planda tutarak ve oluşabilecek hataları bertaraf ederek hizmet vermektedir.

İHRACAT: PAKDUŞ, Türkiye'nin önemli duş kabini üreticilerinden biri olurken, yurtdışında **20'yi aşkın ülkeye** ihracat yapmaktadır.

SATIŞ AĞI: Yetkili satıcılar ve proje bazlı çalışmalar ile satış hedeflerine ulaşılmaktadır.

DEĞERLER: Müşteri memnuniyetini öne çıkaran ve dürüstlüğü ilke edinen PAKDUŞ, **takım ruhu ile çalışan personeli sayesinde hizmet kalitesini artırmaya devam ettirmektedir.**

In **1996**, PAKDUŞ started its production activity and by continuously increasing the capacity has became one of the major shower enclosure manufacturer in Turkey.

PRODUCTION: Our target is to develop new products by considering the market demands. The performance and features of the products are tested through applicative studies. Thus, while ensuring the quality assurance, we try to obtain the optimal **price/performance** balance at the final product.

PRODUCTS: Our models produced by combining the technical power with aesthetics are able to meet all kinds of consumer preferences. The problems that may arise due to measurement are minimized **thanks to our staff of experts specialized in measurement.**

ASSEMBLY: Our **professional and rigorous assembly staff** serves by giving a particular importance to the customer satisfaction and by doing the best to eliminate any potential mistakes.

EXPORT: PAKDUŞ, while being one of the major manufacturers of shower enclosure in Turkey, is also a prestigious exporter in more than **20 countries.**

SALES NETWORK: Sales targets are reached through authorized dealers and project based works.

VALUES: PAKDUŞ, which emphasizes the customer satisfaction and considers the honesty as one of its main principles, **continues to increase the service quality thanks to its team spirit.**

MALZEME TEKNİK BİLGİLERİ

PRES ALÜMİNYUM:

A-1MgSi 0.5 alüminyum alışımindan yapılan hassas toleranslı alüminyum profillerin kimyasal bileşimleri TS EN 573-3'e, mekanik özellikleri TS EN 755-2 uygundur. Bu profiller F22 kondisyonunda olmasından dolayı, delme, kertme, talaşlı imalat ve bükme işlemlerine uygundur.

TOZ BOYA:

Profilleri boyama işlemi, yüzeylerinin temizlenmesi, aşındırılması ve üzerine atılan boyanın çok daha iyi tutmasını sağlayan kimyasal ile kaplama prosesi olan ön işlem ile başlar. Daha sonra profiller, üzerine termoset toz boya partiküllerinden gönderildiği ve otomatik robotlar ile kontrol edilen boya kabine girer.Üzerleri toz boya ile kaplanan profiller, boyanın sertleşmesi için 200 °C'deki fırında 10 dk. tutulur. Sonuç olarak profillerin yüzeyi boyanmış olur. Tüm bu işlemler Qualicoat standartlarına uygun yapılır.

ELOKSAL KAPLAMA:

Alüminyum profil yüzeylerinin krozyon ve dış etmenlere karşı korunması amacıyla uygulanan aynı zamanda alüminyum dekoratif olma özelliğini kaybetmemesini sağlayan anodik oksidasyon işlevidir. Ortalama eloksal kalınlığı 10 - 12 mikrometre mertebesinde olup, üretim Qualanod standartlarına uygun yapılır.

POLİSTREN CAM:

Plastik esaslı bir malzemenin levha haline getirilerek desen verilmesiyle oluşan yarı saydam şeklidir. Kalınlık 1.8 mm - 2.2 mm arasındır.

TEMPER CAM:

Yumuşama noktasından itibaren camın yüzeyinin hızlıca soğutulması ile mekanik dayanımı arttırılmış olup, kırıldığında normal cama göre daha küçük ve köşeli olmayan parçalara ayrılan camdır. 25 cm²'deki parçaçık sayısı en az 6 mm'de 40 adet olmalı ve 10 mm uzun cam bulunmamalıdır. Temper camın ölçüsel ve mekanik özellikleri EN 12150-2 standardına uygundur.

MIKNATIS:

Kayar panel ve hareketli panellerin birbirine bağlantısını sağlayan, birbirine yapışan, manyetik alanlı plastik malzemedir.

Yoğunluk: DIN 53479 (3,61 = 0,3) g/cm³
Shore (Sertlik): DIN 53505 (53 = 5)
Yırtılma Direnci: DIN 53504 (3 N/mm²)
Kopma Uzaması: 200 m/min
Çekme Kuvveti: (505,200 N/cm +/-%10)
Eğilme Dayanımı: 23 = 3
Yaşlanma Testi: +70 °C
Yırtılma Dayanımı: 2 N/mm²

SİLİKON:

İçte ve dışta çok amaçlı kullanım için uygun, nötral karakterde bir polimerdir. Anti-bakteriyel özellik taşımaktadır.

Kopma Kuvveti (kg/cm²): min 6,0 DIN: 53504
Elastikiyet: 280-350 DIN: 53504
Sertlik (Shore A): 25 = 1
Yoğunluk (gr/cm³): 1.00 = 0,02
Genişleme Oranı (%): max 25
Sıcaklık Dayanımı: -40 °C ila +180 °C
Kabuk Bağlama Süresi: Ortalama 15 dk.

VİDA:

Soğuk vurmaya elverişli paslanmaz telden oluşan bağlantı elemanlarıdır.
Özellığı: Inox A2 (Stainless Steel)

FİTİLLER:

Kabinlerde sızdırmayı önleme ve camları panele sabitleme işlemi için kullanılan plastik malzemelerdir.
Çekme Kuvveti: 1517 N/cm² (min)
Uzama: %190 (min)
Sertlik Derecesi: 50 - 80 (Shore A)

PLASTİK PARÇALAR:

Kabinlerde hareketi, sürtünmeyi, kapatmayı, birleşmeyi, sabitlemeyi sağlayan malzemelerdir. Sürtünen malzemeler POM ve türevleri, sabit duran malzemeler ise ABS'dir.

MATERIAL TECHNICAL SPECIFICATION

PRESS ALUMINIUM:

Chemical composition of A-1 MgSi 0.5 aluminum alloy precision tolerance profiles is compliant to the standard TS EN 573-3, and their mechanical features are compliant to the standard TS EN 755-2. For the profiles are F22 conditioned, they are suitable for boring, scoring, machining, and bending processes.

POWDER COAT:

Before profiles are coated, they are first made subject to a pre-treatment including surface cleaning, abrading, and chemical coating, which enables better adherence of the paint. Then profiles are put in robotic paint cabinet, where thermosetting powder paint particles are delivered to. Profiles covered by powder paint are kept in stoves adjusted to 200 °C for 10 minutes to harden the paint. Surface of the profiles becomes painted at the end of the process. All these processes are executed in accordance with Qualicoat standard.

ANODIZED COATING:

This is anodic oxidation process used for the protection of aluminum profile surfaces against corrosion, and external factors, while preserving decorative feature of the aluminum. Average anodic thickness is 10 - 12 micrometers and production is carried out in conformity with Qualanod standards.

POLYSTYRENE GLASS:

It is a half transparent form of plastic-based material, which is turned into plate, and patterned. Thickness ranges between 1.8 mm - 2.2 mm.

TEMPERED GLASS:

It is a glass, which has an increased mechanical strength thanks to rapid cooling of its surface starting from the tempering point, and it is fragmented into small and non-angular pieces when broken, unlike normal glass. Measurements and mechanical features of tempered glass are as per standard EN 12150-2.

MAGNET:

It is an agglutinant plastic material with magnetic field, which enables interconnection of sliding and movable panels.

Density: DIN 53479 (3,61 = 0,3) g/cm³
Shore (Stiffness): DIN 53505 (53 = 5)
Tear Resistance: DIN 53504 (3 N/mm²)
Breaking Elongation: 200 m/min
Tensile Strength: (505,200 N/cm +/-%10)
Bending Strength: 23 = 3
Aging Test: +70 °C
Tear Strength: 2 N/mm²

BOLT:

Fasteners made of stainless steel wire which is suitable for cold forging.
Properties: Inox 2 (Stainless Steel)

SEALS:

Plastic material used for preventing leaks, and fixing glasses on the panel.
Tensile Strength: 1517 N/cm² (min)
Elongation: 190% (min)
Stiffness Degree: 50-80 (Shore A)

PLASTIC COMPONENTS:

These are the material used to enable moving, friction, closing, juncture, fixing in cabinets. Friction materials are POM and its derivatives, while fixed materials are ABS.

SILICON:

It is a neutral polymer suitable for indoor and outdoor multipurpose utilization. It is anti bacterial featured.

Tensile Stress (kg/cm²): min 6,0 DIN: 53504
Elasticity: 280-350 DIN: 53504
Stiffness (Shore A): 25 = 1
Density (gr/cm³): 1.00 = 0,02
Expansion Ratio (%): max 25
Temperature Resistance: -40 °C to +180 °C
Encrusting Time: 15 min. in average

SERTİFİKALAR / CERTIFICATES

NET - X TEKNOLOJİSİ / NET - X TECHNOLOGY

NET - X özel olarak tasarlanmış bir “yapışmaz yüzey teknolojisi” ürünüdür.

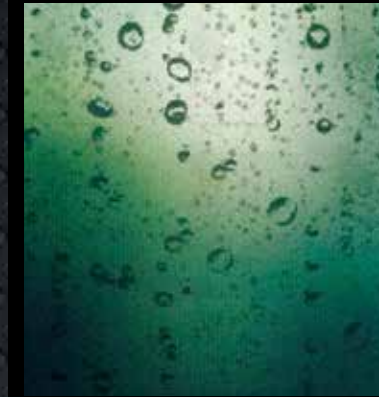

Eşsiz “yapışmazlık” etkisi ile yağ, kir ve kireçlerin kısa sürede oluşmasını engeller, yüzeye daha az yapışmayı ve kolay temizlenmesini sağlar.

NET - X is a specially designed “non-stick surface technology” product.

Its unique “non-stickness” effect prevents oil, dirt and limescale from forming in a short time, makes it less sticky to the surface and easy to clean.
